Regional San	David Ocenosak	7/26/2021	Executive Summary	Page 28	333	Please add to the HW benefits description in the ES that it raises groundwater levels (and not just improves storage). We think this is important to acknowledge in the executive summary. Suggest adding text in bold below: "Moreover, this project will reduce the need for groundwater pumping, support habitat protection efforts, <b>restore depleted groundwater levels up to 35 feet within 15 years</b> , and increase groundwater storage by approximately 245,000 AF within 10 years." (If you don't want the different time periods in one sentence, suggest ending after "increase groundwater storage.")
Regional San	David Ocenosak	7/26/2021	Section 5 Implementation	page 5-9	343	Include acknowledgement that it is anticipated fees will take into account those that have developed alternate water supplies. Suggest adding the following sentence: "Special taxes, assessments, and user fees will be developed with consideration of those that have developed alternate water supplies, such as surface water or recycled water."
Regional San	David Ocenosak	7/26/2021	Appendix 4A and Global			Global comment: please do find/replace for references to Harvest Water as "South County Ag Program." Program should be referred to as "Harvest Water" Main body of GSP seems correct/consistent, but there were a few instances in appendices
